

Report on NDLI Activity: Seminar on 'High Frequency Communication: Innovations by Indians' on 21st December 2023

On 21st December 2023, NDLI Local Chapter of RCCIIT along with Institution's Innovation Council jointly organized one day seminar where Dr. Somak Bhattacharyya, Associate Professor of IIT BHU delivered the talk entitled 'High-frequency Communication: Innovations by Indians'. During one hour, participants traversed a virtual journey from history of communication engineering to the modern developments, where role of Indian scientists and their remarkable achievements are highlighted. The demand of future engineers in the arena of communication technology is tinted, and the breakthrough innovations in the present-day context by the Indians are emphasized. Pioneering works of J. C. Bose and C. V. Raman in the twentieth century and impact on civilization are showed in the landscape of worldwide research, and importance of innovative works and signature on it through IPR is mentioned to justify the owner's claim. The session ended with a fruitful note where research and innovation shared the common platform for future societal benefit.
