### About Department:

Department of Electronics and Communication Engineering is successfully running since 2006 with an intake of 60 seats. In 2010 intake increased to 120; from 2012 the department also started 2 years full time PG program in Tele Communication to make a significant contribution in the field of higher studies.

The Department used to organize seminars, development programs, and workshops for faculties, staffs and students in support of incessant development. A pool of competent faculty member of the Department constantly motivates the students to get placed by means of job, research and higher studies; and the outcomes reflect in the achievement.

The pass out students of the ECE Department now associated with pioneer Institutions like North Dakota State University (USA), University of Regina (Canada), College of Medicine Swansea University (UK), University of Illinois, Chicago (USA), University of Buffalo (USA), Texas Tech University, different IITs (Kharagpur, Kanpur, Roorkee, Guwahati), IIM (Kozhikode), IEST, ISM, Jadavpur University etc. Moreover the students of this Department are also allied with prestigious organizations like BSNL, ECIL, WBSEB, AAI, INTERRA SYSTEM, TCS, CTS, INFOSYS, IBM, ACCENTURE, TECH MAHINDRA, ERICSSON L&T etc. The Department is also involved actively in the frontier research, corroborated by a significant number of research papers in various national and international journals and conferences.

### **Vision of the Department**

Graduates of this department will be part of global academia/industry through sincere professional commitments, research and innovations by ethically considering environmental impacts and societal benefits in the multidisciplinary culture for sustainable development of civilization throughout their career.

### **Mission of the Department**

| <b>Mission No.</b> | <b>Mission Statements</b>  |
|--------------------|--|
| M1                 | Be able to develop sustainable solutions of problems related to electronics and communication engineering as individual or part of a team maintaining professional ethics and environmental aspects. |
| M2                 | Be competent to perceive higher studies through research, innovation and managerial skills for integrated life-long learning..   |
| M3                 | Create leadership qualities through learning beyond classroom, effective communication, interpersonal skill, technological development and innovation for benefit of society                         |

### Program Outcome (POs) of the Department

Engineering Graduates will be able to:

1. **Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. **Problem analysis:** Identify, formulate, research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. **Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The Engineer and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal, and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and Sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of need for sustainable development.
8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

11. **Project Management and Finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**Program Educational Objectives (PEOs) of the Department**

| PEO No. | Program Educational Objectives Statements   |
|---------|---|
| PEO1    | Be competent to solve electronics and communication engineering related problems by applying fundamental principles of natural sciences, domain knowledge using modern tools, techniques and inter-personal skills for early employment in industry/academia. |
| PEO2    | Be part of diverse multinational sectors by continuously interpreting global professional development through innovative research and self-study in subject domain and allied fields as a part of life-long learning.   |
| PEO3    | Be qualified to construct professional work using acquired domain knowledge as individual or team-member in global environment pertaining to electronics fulfilling ethical, societal and environmental issues.   |

**Program Specific Outcomes (PSOs)**

| PSO No. | Program Specific Outcome(PSOs) Statements   |
|---------|---|
| PSO1    | Investigate the design/development of intra and interdisciplinary complex problems/systems through acquired technical knowledge in the field of electronics and communication engineering using state-of-the-art hardware and software tools. |
| PSO2    | Estimate every multidisciplinary project in the light of professional ethics for societal welfare prior to implementation and keeping the environment safe through teamwork or individual means.  |
| PSO3    | Invent novel technical solutions applicable for academia/industry relevant to electronics and communication engineering through complex engineering activities maintaining specified constraints with possible life-long impact.              |

**Correlation between PEOs and Mission of the Department of Electronics & Communication Engineering, RCCIIT**

| PEO No. | PEO statements  | M1 | M2 | M3 |
|---------|---|----|----|----|
| PEO1    | Be competent to solve electronics and communication engineering related problems by applying fundamental principles of natural sciences, domain knowledge using modern tools, techniques and inter-personal skills for early employment in industry/academia. | 3  | 2  | 2  |
| PEO2    | Be part of diverse multinational sectors by continuously interpreting global professional development through innovative research and self-study in subject domain and allied fields as a part of life-long learning.   | 1  | 3  | 3  |
| PEO3    | Be qualified to construct professional work using acquired domain knowledge as individual or team-member in global environment pertaining to electronics fulfilling ethical, societal and environmental issues.   | 2  | 2  | 3  |

1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High)

**Pre-requisites:** Fundamental knowledge on communications

**Course Objective (COb's) of Wireless communication and networks:**

**EC701:COb1:**An understanding on functioning of wireless communication system and evolution of different wireless communication systems and standards.

**EC701:COb2:**An ability to compare recent technologies used for wireless communication.

**EC701:COb3:**An ability to explain the architecture, functioning, protocols, capabilities and application of various wireless communication networks.

**EC701:COb4:**An ability to explain multiple access techniques for Wireless Communication

**EC701:COb5:** An ability to evaluate design challenges, constraints and security issues associated with Ad-hoc wireless network

**Course Outcomes (CO's) of Wireless communication and networks**

On completion of the course students will be able to

| CO Number | CO statement  | Knowledge Level of revised Bloom's Taxonomy |
|-----------|---|---|
| EC701.CO1 | <b>Understand</b> the concept of wireless communication system to demonstrate cellular structure, frequency reuse, cell splitting, capacity enhancement techniques for cellular networks, channel assignment schemes. | K2: Understanding                           |
| EC701.CO2 | <b>Discuss</b> about characteristics of wireless channel and propagation path loss models to estimate different types of fading effects.  | K6: Creating                                |
| EC701.CO3 | <b>Analyze</b> the different types of mobile wireless communication systems to examine modern evolution strategies of wireless network.   | K4: Analyzing                               |
| EC701.CO4 | <b>Define</b> the concept of multiple access technologies in cellular communication to exhibit the efficiency.  | K1: Remembering                             |
| EC701.CO5 | <b>Understand</b> different architecture and access mechanisms for CDMA, WLAN, wireless broad band networks to explain different applications in wireless communication.  | K2: Understanding                           |
| EC701.CO6 | <b>Analyze</b> different types of mobile internet protocol to examine tunneling and routing process for accessing external PDN.   | K4: Analyzing                               |

**Mapping of COs with POs and PSOs (Course Articulation Matrix):**

University Syllabus:

| Module   | Content   | Hrs/Unit |
|--|---|----------|
| Module 1: Cellular Structure                           | Cellular Mobile Wireless Networks: Systems and Design Fundamentals: Brief introduction to mobile wireless communication and systems, Description of cellular system, Cellular Structure, Frequency Reuse, Cell clustering, Capacity enhancement techniques for cellular networks, cell splitting, antenna sectoring, Co-channel and Adjacent channel interferences, Channel assignment schemes – Fixed channel, Dynamic channel and Hybrid channel, mobility management location management and handoff management, handoff process, different types of handoff. [6L]<br>Characteristics of wireless channel and propagation path loss models: Different Multi-path propagation mechanisms, Multi-path effects on mobile communication, Fading, different types of fading, small and large scale fading, slow and fast fading, narrowband and wideband fading, Inter symbol interference, fast fading model, Doppler effect due to velocity of mobiles, Rayleigh envelop, free space propagation model, two ray ground reflection model, log distance path loss model, log normal shadowing model, macro and micro cell propagation models, types of base stations and mobile station antennas. [6L]  | 12       |
| Module 2: Modern Mobile Wireless Communication Systems | Modern Mobile Wireless Communication Systems Evolution strategies – First Generation (1G) to Fourth Generation (4G), Personal Area Networks :PAN, Low Tier Wireless System: Cordless Telephone, Second Generation (CT2), Digital European Cordless Telecommunications (DECT), Public wide-area Wireless Networks: 1 G to 3G cellular networks. [2L]<br>Multiple Access Technologies in cellular communication, Time division multiple access (TDMA), narrowband and wideband TDMA, synchronous and asynchronous TDMA, Frequency division multiple access (FDMA), Code Division Multiple Access (CDMA), Direct-sequence CDMA, spread spectrum technique, spectral efficiency of different wireless access technologies: Spectral Efficiency in FDMA system, Spectral Efficiency in TDMA system, Spectral Efficiency for DS-CDMA system. [3L]<br>Cellular Communication Networks and Systems Second generation (2G) Network: Global system for mobile communication (GSM): Architecture and Protocols Air Interface, GSM spectrum, GSM Multiple Access Scheme, GSM Channel Organization, Traffic Channel multi-frame, Control (Signaling) Channel Multi-frame, Frames, Multi-frames, Superframes and Hyper-frames, GSM Call Set up Procedure, Location Update Procedure, Routing of a call to a Mobile Subscriber. [ 3L]<br>The concept of packet data services The 2.5 G General Packet Radio Services: GPRS Networks Architecture, GPRS Interfaces and Reference Points, GPRS Mobility Management Procedures, GPRS Attachment and Detachment Procedures, Session Management and PDP Context, Data Transfer through GPRS Network and Routing, The IP Internetworking Model. [3L] | 11       |
| Module 3: CDMA, WLAN                                   | Overview of CDMA systems: IS-95 Networks and 3G – The Universal Mobile Telecommunication System (UMTS) CDMA based IS-95 Systems, forward link and reverse link for IS-95, handoff process in CDMA based IS-95 network. UMTS Network Architecture –Release 99, UMTS Interfaces, UMTS Network Evolution UMTS Release 4 and 5, UMTS FDD and TDD, UMTS Channels, Logical Channels, UMTS Time Slots. [3L]<br>Wireless Local Area Networks (WLAN): IEEE 802.11 Standards and Protocols IEEE 802.11 standards, WLAN family, WLAN transmission technology, WLAN system architecture, Collision Sense Multiple Access with Collision Detection (CSMA/CD) and CSMA collision avoidance (CSMA/CA), Frequency Hopping Spread Spectra, 802.11 PHY and MAC layers, IEEE 802.11 Distributed Coordination function (DCF) and Point coordination function (PCF), Back off algorithm, Virtual carrier sense, MAC frame format. Security and QoS issues, WLAN applications. [ 4L]<br>Wireless Broadband Networks and Access, Evolution of broadband wireless, IEEE 802.16 standards : WiMAX , Spectrum Allocation, IEEE 802.16 Standard Architecture, Overview of WiMAX PHY, IEEE 802.16 MAC Layer, IEEE 802.16 Scheduling Services, Unsolicited Grant Service (UGS), Real-time Polling Service (rtPS), Non-realtime Polling Service (nrtPS), Best Effort (BE) Overview of 3G Long Term Evolution (3G LTE) for broadband wireless communication, Orthogonal Frequency Division Multiple Access (OFDMA). [3L]   | 10       |
| Module 4: Mobile Internet Protocol                     | Mobile Internet Protocol: Basic Mobile IP, Mobile IP Type-MIPv4 and MIPv6, Mobile IP: Concept, Four basic entities for MIPv4, Mobile IPv4 Operations, Registration,   | 3        |

| <b>Course Title: Microelectronics &amp; VLSI Designs</b>              | <b>Code: EC702</b>                       |
| <b>Type Of Course: Theory</b>   | <b>Course Designation: Compulsory</b>    |
| <b>Semester: 7<sup>th</sup></b>                                       | <b>Contact Hours: 3L/week</b>            |
| <b>Continuous Assessment: 25 Marks</b><br><b>Attendance : 5 Marks</b> | <b>Final Exam: 70 Marks</b>              |
| <b>Writer: (Course Coordinator)</b>                                   | <b>Approved by HoD (Convenor of DAB)</b> |

**Pre-requisite:** Knowledge about MOS, MOS-Characteristics, MOS Gates , Basic Electronics, solid state device principles.

**Course Objective (COb's) of Microelectronics & VLSI Designs :**

- EC702:COb1:** Be able to apply VLSI design principles in understanding of different IC technology
- EC702:COb2:** Be able to understand the evolving technology associated with VLSI chip fabrication.
- EC702:COb3:** Be able to analyze and design C-MOS circuits using modeling techniques.
- EC702:COb4:** Be capable of evaluating different parameters associated with designing of C-MOS inverters.
- EC702:COb5:** Be able to design and evaluate digital C-MOS circuits, latches, registers, finite state machines.
- EC702:COb6:** Be able to analyze and design practical analog circuits with C-MOS logic.

**Course Outcome (CO's) of Microelectronics & VLSI Designs:**

On completion of the course students will be able to

| CO#               | CO Statements   | Bloom's Revised Knowledge Level |
|-------------------|---|---------------------------------|
| <b>EC702.CO1:</b> | <b>Explain</b> VLSI Design concept along with design principles to provide appropriate understanding of VLSI chips. | (K2)- <b>Understanding</b>      |
| <b>EC702.CO2:</b> | <b>Explain</b> different Microelectronic process in Silicon Semiconductor technology for chip Fabrication           | (K2)- <b>Understanding</b>      |
| <b>EC702.CO3:</b> | <b>Develop</b> the techniques for effective and efficient modelling for Basic C-MOS technology.                     | (K3)- <b>Applying</b>           |
| <b>EC702.CO4:</b> | <b>Recall</b> the knowledge of Basics of C-MOS and C-MOS inverter characteristics                                   | (K1)- Remembering               |
| <b>EC702.CO5:</b> | <b>Apply</b> the knowledge of C-MOS digital logic design to implement combinational & sequential logic circuits.    | (K3)- <b>Applying</b>           |
| <b>EC702.CO6:</b> | <b>Analyze</b> different basic building blocks of analog VLSI chips and their applications.                         | (K4)- <b>Analyzing</b>          |

**Mapping of CO with PO's and PSO's (Course Articulation Matrix):**

**University Syllabus:**

| Module  | Content   | Hrs/Unit |
|---|---|----------|
| <b>Module 1:</b><br>Introduction to VLSI Design:                    | Recapitulation of Conductor, Insulator & Semiconductor with special emphasis on the concept of energy bands and band-gaps, E-k diagrams for direct and indirect band-gap semiconductors [2L]<br>Design principles (Digital VLSI – Concept of Regularity, Granularity etc), Design Domains (Behavioral, Structural) [4L]   | 06       |
| <b>Module 2:</b><br>Micro-electronic Processes for VLSI Fabrication | Silicon Semiconductor Technology- An Overview, Wafer processing [1L]<br>Oxidation, Epitaxial deposition, Ion-implantation & Diffusion [1L]<br>Cleaning, Etching [1L]<br>Photo-lithography – Positive & Negative photo-resist [1L]<br>Basic CMOS Technology – (Steps in fabricating CMOS ) [1L]<br>Basic n-well CMOS process, p-well CMOS process, Twin tub process [1L]<br>Silicon on insulator [1L]<br>Layout Design Rule: Stick diagram with examples [2L]<br>Layout rules [1L] | 10       |
| <b>Module 3:</b><br>CMOS for Digital VLSI Circuits                  | Recapitulation of MOS [2L]<br>CMOS, CMOS inverter characteristics [1L]<br>CMOS logic circuits, NAND & NOR Gates [1L]<br>Complex logic circuits [1L]<br>CMOS Full Adder [1L]<br>CMOS Transmission GATE [1L]<br>Advanced CMOS Logic circuits; Sequential CMOS logic circuits [1L]<br>SR Latch circuit, clocked JK Latch/ Master-Slave JK [1L]<br>CMOS D-latch & Edge triggered flip-flop [1L]   | 10       |
| <b>Module 4:</b><br>Analog VLSI Circuits                            | Analog VLSI design steps [1L]<br>Basic building blocks of Analog VLSI chips [1L]<br>MOS switch [1L]<br>Active load / resistors, Voltage dividers [1L]<br>CMOS Current source & sink; CMOS Voltage references/voltage dividers [Basic circuits only] [1L]<br>CMOS Differential amplifier; Output amplifiers [Basic circuits only] [1L]<br>CMOS OPAMP [1L]<br>Switched capacitor filter [1L]  | 08       |

**GATE syllabus mapping:**

| GATE syllabus content  | Mapping unit of university syllabus |
|--|-------------------------------------|
| MOS capacitor, MOSFET basics, 2 terminal MOS, MOS working regions  | Module 3                            |
| BJT and MOSFET amplifiers: biasing, ac coupling, small signal analysis, frequency response. Current mirrors and differential amplifiers. | Module 4                            |
| logic gates and their static CMOS implementations, arithmetic circuits, code converters, multiplexers, decoders                          | Module 3, 4                         |
| latches and flip-flops, counters, shift-registers, finite state machines, propagation delay, setup and hold time, critical path delay    | Module 3                            |

|  |                                      |
|--|--------------------------------------|
| Machine instructions and addressing modes, ALU, data-path and control unit, instruction pipelining | Not available in University syllabus |
|--|--------------------------------------|

**University Syllabus:**

| Unit                     | Content  | Hrs/Unit |
|--------------------------|--|----------|
| 1: Introduction to Radar | 1. Historical background, radar terminology, radar band designations, Radar block diagram, Transmitted power, pulse-repetition frequency, radar cross section<br><br>2. Radar equation: detection of signals in noise and signal-to-noise ratio, Probabilities of detection & False alarm, integration of radar pulses, distributed targets<br><br>3. Antenna parameters & system losses, introduction to radar clutter. | 6        |

|                              |  |    |
|------------------------------|--|----|
| 2: Radar Types               | <p>1. Pulse radars and CW radars, Advantages of coherent radar, Doppler effect, Doppler radar</p> <p>2. MTI, Delay-line cancellers, blind speeds, staggered PRFs, Digital filter bank, limitations of MTI</p> <p>3. Tracking with radar, monopulse tracking, conical scan, limitation to tracking accuracy</p>   | 8  |
| 3: Radar signals & clutter   | <p>1. Basic radar measurement, theoretical accuracy of radar measurements, Range and velocity ambiguities, the ambiguity diagram</p> <p>2. Pulse compression-principles, the matched filter, chirp waveforms, Waveform design: nonlinear FM, phase codes, waveform generation and compression</p> <p>3. Descriptions of land &amp; sea clutter, statistical models for surface clutter, detection of targets in clutter.</p>   | 10 |
| 4: Devices and Radar Systems | <p>1. Radar transmitter: Solid-state RF power source, Magnetron, other RF power sources</p> <p>2. Radar receiver: Super heterodyne receiver, receiver noise figure, duplexers &amp; diplexers, Receiver protectors</p> <p>3. Applications: Electronic Warfare: ESM, ECM, ECCM; super resolution, IFM, types of jammers, Stealth and counter-stealth: stealth techniques for aircraft and other target types, low frequency and UWB radar, System design examples</p> | 8  |

**University Syllabus:**

| Unit     | Content  | Hrs/Unit |
|----------|--|----------|
| Module 1 | Introduction to Embedded System : Embedded system Vs General computing systems, History of Embedded systems, Purpose of Embedded systems, Microprocessor and Microcontroller, Hardware architecture of the real time systems.  | 5        |
| Module 2 | Devices and Communication Buses: I/o types, serial and parallel communication devices, wireless communication devices, timer and counting devices, watchdog timer, real time clock, serial bus communication protocols, parallel communication network using ISA, PCI, PCT-X, Intrnet embedded system network protocols, USB, Bluetooth. | 10       |
| Module 4 | Program Modelling Concepts ; Fundamental issues in Hardware software co-design, Unified Modelling Language(UML), Hardware Software trade-offs DFG model, state machine programming model, model for multiprocessor system.   | 5        |
| Module 5 | Real Time Operating Systems : Operating system basics, Tasks, Process and Threads, Multiprocessing and multitasking, task communication, task synchronization, qualities of good RTOS.   | 8        |
| Module 6 | Examples of Embedded System : Mobile phones, RFID, WISENET, Robotics, Biomedical Applications, Brain machine interface etc. Popular microcontrollers used in embedded systems, sensors, actuators.   | 6        |
| Module 7 | Programming concepts and embedded programming in C, C++, JAVA.   | 4        |

| <b>Course Title: Data Base Management System</b> | <b>Code: EC705C</b>                   |
| <b>Type of Course: Theory</b>                    | <b>Course Designation: Compulsory</b> |
| <b>Semester: 7<sup>th</sup></b>                  | <b>Contact Hours: 3L/week</b>         |
| <b>Course Coordinator</b>                        |                                       |

**COURSE OUTCOMES (COs)**

On completion of the course students will be able to

| Course Outcomes   | Details  | Action Verb | Knowledge Level |
|-------------------|--|-------------|-----------------|
| <b>EC705C.CO1</b> | Describe the basic concept of database and different database models along with database languages like DDL, DML etc, Data Abstraction, and Data Independence.   | Remember    | K1              |
| <b>EC705C.CO2</b> | Identify different approaches for solving queries such as Relational algebra, Tuple and domain relational calculus, considering the query optimization strategies, and different normal forms for relational database normalization. | Apply       | K3              |
| <b>EC705C.CO3</b> | Evaluate the applications of different storage strategies such as Indices, B-trees, hashing  | Evaluate    | K5              |
| <b>EC705C.CO4</b> | Understand the transaction processing and concurrency control strategies including ACID property, serializability of scheduling, locking and timestamp-based schedulers, Database recovery.  | Understand  | K2              |
| <b>EC705C.CO5</b> | Analyze the database security approaches including authentication, authorization and access control, DAC, MAC and RBAC models, intrusion detection, SQL injection etc.   | Analyze     | K4              |
| <b>EC705C.CO6</b> | Explain the advanced concepts related to DBMS such as object oriented and object relational databases, logical databases, web databases, distributed databases, data warehousing and data mining.                                    | Understand  | K2              |

**Mapping of COs with POs and PSOs:**

|--|--|
| <b>Course Title: Industrial Training</b> | <b>Code: EC781</b>                       |
| <b>Type of Course: Sessional</b>         | <b>Course Designation: Compulsory</b>    |
| <b>Semester: 7<sup>th</sup></b>          | <b>Contact Hours: N/A</b>                |
| <b>Assessment: 100 marks</b>             |  |
| <b>Writer: (Course Coordinator)</b>      | <b>Approved by HoD (Convenor of DAB)</b> |

**Pre-requisites:** Knowledge of fundamental principles of Science & Engineering, Ethics and Environment, Management, Economics

**Course Objectives (COB's) of Industrial Training**

- EC781:COB1:** Be able to apply principles of Science and Engineering for solving cutting-edge industrial/academic problems
- EC781:COB2:** Be able to analyze assigned task within pre-defined time-limit under pseudo-working culture for that specific organization
- EC781:COB3:** Be capable to interpret technical as well as commercial problems for recognizing solutions with acquired knowledge and expertise
- EC781:COB4:** Be judgmental to analyze impact of developed solution from ethical and environmental point-of-view
- EC781:COB5:** Be able to associate responsibility with technical efficiency for computing solution of assigned problem in sequential way
- EC781:COB6:** Be accomplished for judging the life-long impact of acquired expertise through technical and soft skills

**COURSE OUTCOMES (CO's)**

On completion of the course students will be able to

| CO Number         | CO statement   | Knowledge Level of revised Bloom's Taxonomy |
|-------------------|--|---|
| <b>EC781: CO1</b> | <b>Apply</b> fundamental principles of engineering knowledge to understand cutting-edge technologies relevant to present industry/higher academia              | <b>K3: Applying</b>                         |
| <b>EC781: CO2</b> | <b>Investigate</b> relevant technical problem within specified time limit under pseudo-working environment in smaller organizational structure                 | <b>K4: Analyzing</b>                        |
| <b>EC781: CO3</b> | <b>Interpret</b> intra-disciplinary/multidisciplinary techno-commercial problems for identifying prototype solutions with acquired skill and proficiency       | <b>K4: Analyzing</b>                        |
| <b>EC781: CO4</b> | <b>Measure</b> potential impact of learned skill from ethical, social and environmental aspect for benefit of society  | <b>K5: Evaluating</b>                       |
| <b>EC781: CO5</b> | <b>Integrate</b> responsibility, cooperation and synergetic collaboration for determining optimized solution of assigned engineering task in systematic manner | <b>K6: Creating</b>                         |
| <b>EC781: CO6</b> | <b>Evaluate</b> significance of newly adopted skill and technology as a part of possible life-long impact  | <b>K6: Creating</b>                         |

**Mapping of COs with POs and PSOs (Course Articulation Matrix):**

| Course Title: Project Part-I     | Code: EC782                       |
| Type of Course:                  | Course Designation: Sessional     |
| Semester: 7 <sup>th</sup>        | Contact Hours: 3P/week            |
| Continuous Assessment: 100 marks |                                   |
| Writer: (Course Coordinators)    | Approved by HoD (Convenor of DAB) |

**Course Outcomes (CO's) of Project Part-I**

On completion of the course students will be able to

| CO number | CO Statements  | Bloom's Revised Knowledge Level |
|-----------|--|---------------------------------|
| EC782.CO1 | <b>Select</b> the project ideas through literature survey and social need to solve engineering problems. | <b>K3:Applying</b>              |
| EC782.CO2 | <b>Apply</b> engineering knowledge to define problem statement.  | <b>K3:Applying</b>              |
| EC782.CO3 | <b>Develop</b> the design strategy for the complete project work.  | <b>K6:Creating</b>              |
| EC782.CO4 | <b>Apply</b> the appropriate modern tools to execute the project work.                                   | <b>K3:Applying</b>              |
| EC782.CO5 | <b>Explain</b> the project to evaluate the progress of the work.   | <b>K5:Evaluating</b>            |
| EC782.CO6 | <b>Defend</b> the outcomes to justify the findings.  | <b>K5:Evaluating</b>            |

**Mapping of COs with POs and PSOs (Course Articulation Matrix):**

| <b>Writer: Subhrajit Sinha Roy and Apu Mistry<br/>(Course Coordinators)</b> | <b>Approved by HoD (Convenor of DAB)</b> |

**Pre-requisites:** Analog Electronics, Digital Electronics

**Course Outcomes (CO's) of VLSI Design Lab**

On completion of the course students will be able to

| CO Number | CO statement  | Knowledge Level of revised Bloom's Taxonomy |
|-----------|---|---|
| EC792.CO1 | <b>Understand</b> the utilization of spice and FPGA based simulation tools in VLSI circuit designing.                             | K2: Understand                              |
| EC792.CO2 | <b>Develop</b> HDL code using FPGA to realize different combinational and sequential circuits.                                    | K3: Develop                                 |
| EC792.CO3 | <b>Experiment with</b> MOS Inverter using PSPICE simulator to analyze its transient response.                                     | K3: Experiment with                         |
| EC792.CO4 | <b>Design</b> standard cell and transistors layouts to verify the transient behavior and V-I characteristics with power analysis. | K6: Design                                  |
| EC792.CO5 | <b>Analyze</b> CMOS based logic gates through spice simulation tools to verify the behavioral characteristics.                    | K4: Analyze                                 |
| EC792.CO6 | <b>Design</b> register and counter based circuits to deploy these in data processing and data storing.                            | K6: Develop                                 |

**Mapping of COs with POs and PSOs (Course Articulation Matrix):**

**University Syllabus:**

| Unit                                | Content  | Hrs/Unit |
|-------------------------------------|--|----------|
| 1: Spice Simulation                 | 1. Familiarity with Spice simulation tool<br>2. Spice Simulation of Inverter, NAND, NOR Gates.   | 9        |
| 2: Basic and Combinational Circuits | 1. Familiarity with EDA tools for VLSI design /FPGA based system design<br>2. Layouts, Transistors and tools.<br>3. Standard cell Design<br>4. Design of CMOS XOR/XNOR Gates.<br>5. Design of CMOS Full adder  | 12       |
| 3: Sequential circuits              | 1. Design of CMOS Flip flops ( R-S ,D , J-K)<br>2. Design of 8 bit synchronous Counter<br>3. Design of 8 bit bi-directional register with tri-stated input/output bus<br>4. Design of a 12 bit CPU with few instructions and implementation and validation on FPGA | 15       |

| <b>Course Title: RF &amp; Microwave Engg Lab</b>        | <b>Code: EC793A</b>                      |
| <b>Type of Course: Lab</b>                              | <b>Course Designation: Optional</b>      |
| <b>Semester: 7<sup>th</sup></b>                         | <b>Contact Hours: 3P/week</b>            |
| <b>Continuous Assessment: 40 marks(PCA1 &amp; PCA2)</b> | <b>Final Exam: 60 Marks</b>              |
| <b>Writer: (Course Coordinator)</b>                     | <b>Approved by HoD (Convenor of DAB)</b> |

**Pre-requisites:** Knowledge on Physics, EM Theory, Programming software

**Course Outcomes (CO's) of RF & Microwave Engg Lab:**

On completion of the course, students will be able to

| CO Number          | CO statement   | Knowledge Level of revised Bloom's Taxonomy |
|--------------------|--|---|
| <b>EC793A: CO1</b> | <b>Analyze</b> microwave test-bench for evaluating bounded propagation wave properties                             | <b>K4: Analyzing</b>                        |
| <b>EC793A:CO2</b>  | <b>Analyze</b> network properties of RF propagating wave inside bounded media for examining field patterns         | <b>K4: Analyzing</b>                        |
| <b>EC793A:CO3</b>  | <b>Measure</b> the electrical characteristics of microwave active devices for high power applications              | <b>K5: Evaluating</b>                       |
| <b>EC793A:CO4</b>  | <b>Evaluate</b> negative resistance property of microwave semiconductor device for low power applications          | <b>K5: Evaluating</b>                       |
| <b>EC793A:CO5</b>  | <b>Estimate</b> RF wave propagation in pre-defined frequency spectrum using active components                      | <b>K5: Evaluating</b>                       |
| <b>EC793A:CO6</b>  | <b>Evaluate</b> the RF properties of microwave multi-port passive networks and components for circuit applications | <b>K5: Evaluating</b>                       |

**Mapping of COs with POs and PSOs (Course Articulation Matrix):**

**University Syllabus:**

| Module          | Content  | Hrs/Unit |
|-----------------|--|----------|
| <b>Module 1</b> | <b>Ex 1:</b> Determination of phase and group velocities in a waveguide carrying TE <sub>10</sub> Wave from Dispersion diagram [ $\omega$ - $\beta$ Plot].   | 3        |
|                 | <b>Ex 2:</b> Measurement of unknown impedance using shift in minima technique using a waveguide test bench/ Measurement of the susceptance of an inductive and or a capacitive window using shift in minima technique using a waveguide test bench | 3        |
|                 | <b>Ex 3:</b> Study of the characteristics of a Reflex Klystron oscillator  |          |
|                 | <b>Ex4:</b> Study of Gunn-oscillator Characteristics using X-band waveguide test bench.  | 3        |
|                 | <b>Ex 5:</b> Measurement of coupling factor, Directivity, Insertion loss and Isolation of a Directional coupler using X-band waveguide test bench set up.  | 3        |
|                 | <b>Ex 6:</b> Scattering matrix of a magic tee / E-plane tee / H-plane tee using waveguide test bench at X-band.  | 3        |
|                 | <b>Ex 7.</b> Measuring of dielectric constant of a material using waveguide test bench at X-band.  | 3        |
| <b>Module 2</b> | <b>Ex 1:</b> Simulation Study of filter (LPF, HPF,BPF) response.   | 3        |

**University Syllabus:**

| Unit      | Content   | Hrs/Unit |
|-----------|---|----------|
| Module 1  | Structure of Solids : Atoms and their binding, Bonds, Crystal Systems, Bravais Lattice Miller Indices, Crystalline, Polycrystalline and Amorphous Materials; Metals, Semiconductors and Insulators, Lattice defects-Qualitative ideas of point, line, surface and volume defects. | 5        |
| Module 2  | Dielectric Properties : Dielectric Polarization and Mechanism- Internal or local field, Dielectric Loss, Temperature and Frequency dependence of dielectric constant, Elementary ideas of Piezoelectrics, Ferroelectrics and Pyroelectric Materials and its Applications.         | 4        |
| Module 4  | Magnetic Properties : Elementary ideas of classification of magnetic materials – Diamagnetism, Paramagnetism, Ferromagnetism, Ferrimagnetism, Magnetic Domains.   | 2        |
| Module 5  | Superconductors : Basic concepts of superconductivity, Transition temperature, Meissner effect High-T superconductors, Hard and Soft Materials, SQUID.  | 3        |
| Module 6  | Optical properties : Absorption, Emission, Luminescence, Electro-optic and Acousto-optic effects, Photorefractive effects.  | 3        |
| Module 7  | Materials for Optical Communication : LED and Laser Materials, Optical Fibre.   | 3        |
| Module 8  | Materials for Data Storage : Magnetic Cores, Tapes, Disks, Hard disk, Floppy disk, Magneto-optic devices, Bubble memories, Magneto-electronic Materials, CD, DVD, CCD.  | 5        |
| Module 9  | Materials for Display Devices : CRT, LED, LCD, TFT, Plasma Display.   | 3        |
| Module 10 | Advanced Materials : Metallic Glasses, Nanomaterials, etc.  | 2        |

**Pre-requisites:** Digital Signal Processing, Signals and Systems, Digital Communication

### Course Outcomes (CO's) of Digital Image Processing

On completion of the course students will be able to

| CO# | CO Statement  | Bloom's Revised knowledge Level |
|-----|---|---------------------------------|
| CO1 | <b>Understand</b> human visual system and importance of adequate sampling frequencies to representat digital images             | <b>K2: Understand</b>           |
| CO2 | <b>Apply</b> signal processing techniques for image enhancement in spatial and frequency domain.                                | <b>K3: Apply</b>                |
| CO3 | <b>Analyze</b> images in the frequency domain using various transforms.   | <b>K4: Analyze</b>              |
| CO4 | <b>Evaluate</b> different image segmentation methodologies to classify and identify different objects present in an image       | <b>K5: Evaluate</b>             |
| CO5 | <b>Categorize</b> various lossy and lossless image compression techniques to reduce redundancies                                | <b>K4: Analyze</b>              |
| CO6 | <b>Execute</b> the relationship between important features of an image to interpret significant abstractions from the raw image | <b>K3: Execute</b>              |

### Mapping of COs with POs and PSOs (Course Articulation Matrix):

|-----|------|------|------|------|------|------|------|---|---|---|---|------|------|------|------|

**University Syllabus:**

| Unit  | Content  | Hrs/Unit |
|---|--|----------|
| 1: Digital Image Processing Systems                       | Introduction to structure of human eye, Image formation in the human eye, Brightness adaptation and discrimination, Image sensing and acquisition, storage, Processing, Communication, Display Image Sampling and quantization, Basic relationships between pixels.                | 4        |
| 2. Image Transforms (implementation)                      | Introduction to Fourier transform, DFT and 2-D DFT, Properties of 2-D DFT, FFT, IFFT, Walsh transform, Hadamard transform, Discrete cosine transform, Slant transform, Optimum transform: Karhunen - Loeve (Hotelling) transform.  | 7        |
| 3: Image Enhancement in the Spatial and Frequency Domain: | Gray level transformations, Histogram processing, Arithmetic and logic operations, Spatial filtering: Introduction, Smoothing and sharpening filters. Frequency domain filters: Homomorphic filtering.   | 6        |
| 4: Image Data Compression:                                | Fundamentals, Redundancies: Coding, Interpixel Psycho-visual, fidelity criteria, Image compression models, Error free compression, Lossy compression, Image compression standards: Binary image and Continuous tone Still Image compression standards, Video compression standards | 6        |
| 5. Morphological Image Processing:                        | Introduction, Dilation, Erosion, Opening, closing, Hit -or-miss transformation, Morphological algorithm operations on binary Images, Morphological algorithm operations on gray-scale Images   | 6        |
| 6. Image Segmentation, Representation and Description:    | Detection of discontinuities, Edge linking and Boundary detection, Thresholding Region based segmentation, Image Representation schemes, Boundary descriptors, and Regional descriptors.   | 7        |

On completion of the course students will be able to

| CO Number        | CO statement   | Knowledge Level of revised Bloom's Taxonomy |
|------------------|--|---|
| <b>HU801.CO1</b> | Recall the concepts of Personnel Management and learn different theories used in industries.     | K1:Remembering                              |
| <b>HU801.CO2</b> | Discuss the appropriate organizational behaviour theory required for solving real life problems. | K6:Creating                                 |
| <b>HU801.CO3</b> | Apply and demonstrate the use of Management concepts.  | K3:Applying                                 |
| <b>HU801.CO4</b> | Analyze the functions of Staffing.   | K4:Analyzing                                |
| <b>HU801.CO5</b> | Design the performance appraisal techniques.   | K6:Creating                                 |
| <b>HU801.CO6</b> | Undersand MBO and learn its application in organizations.  | K2:Understand                               |

**University Syllabus:**

1. Organizational Behaviour: Definition, Importance, Historical Background, Fundamental Concepts of OB, Challenges and Opportunities for OB. [2]
2. Personality and Attitudes: Meaning of personality, Personality Determinants and Traits, Development of Personality, Types of Attitudes, Job Satisfaction. [2]
3. Perception: Definition, Nature and Importance, Factors influencing Perception, Perceptual Selectivity, Link between Perception and Decision Making. [2]
4. Motivation: Definition, Theories of Motivation - Maslow's Hierarchy of Needs Theory, McGregor's Theory X & Y, Herzberg's Motivation-Hygiene Theory, Alderfer's ERG Theory, McClelland's Theory of Needs, Vroom's Expectancy Theory. [4]
5. Group Behaviour: Characteristics of Group, Types of Groups, Stages of Group Development, Group Decision Making. [2]
6. Communication: Communication Process, Direction of Communication, Barriers to Effective Communication. [2]
7. Leadership: Definition, Importance, Theories of Leadership Styles. [2]

8. Organizational Politics: Definition, Factors contributing to Political Behaviour. [2]
9. Conflict Management: Traditional vis-a-vis Modern View of Conflict, Functional and Dysfunctional Conflict, Conflict Process, Negotiation – Bargaining Strategies, Negotiation Process. [2]
10. Organizational Design: Various Organizational Structures and their Effects on Human Behaviour, Concepts of Organizational Climate and Organizational Culture. [4]

Resources:

1. Robbins, S. P. & Judge, T.A.: Organizational Behavior, Pearson Education, 15<sup>th</sup> Edn.
2. Luthans, Fred: Organizational Behavior, McGraw Hill, 12<sup>th</sup> Edn.
3. Shukla, Madhukar: Understanding Organizations – Organizational Theory & Practice in India, PHI
4. Fincham, R. & Rhodes, P.: Principles of Organizational Behaviour, OUP, 4<sup>th</sup> Edn.
5. Hersey, P., Blanchard, K.H., Johnson, D.E. - Management of Organizational Behavior Leading Human Resources, PHI, 10<sup>th</sup>Edn.

| <b>Course Title: Design Lab</b>         | <b>Code: EC881</b>                       |
| <b>Type of Course: Lab</b>              | <b>Course Designation: Sessional</b>     |
| <b>Semester: 8<sup>th</sup></b>         | <b>Contact Hours: 6P/week</b>            |
| <b>Continuous Assessment: 100 marks</b> |  |
| <b>Writer: (Course Coordinators)</b>    | <b>Approved by HoD (Convenor of DAB)</b> |

**Pre-requisites:** Analog Electronics, Digital Electronics

**Course Outcomes (CO's) of Design Lab**

On completion of the course students will be able to

| CO Number | CO statement   | Knowledge Level of revised Bloom's Taxonomy |
|-----------|--|---|
| EC881.CO1 | <b>Design</b> of basic analog building blocks for filtering, amplifying and oscillating applied signals using discrete devices and components  | K3: Applying                                |
| EC881.CO2 | Based on a specific and required logic pattern, <b>develop</b> digital circuits with minimum no of discrete components                         | K3: Applying                                |
| EC881.CO3 | For pre-defined electrical outputs, <b>construct</b> analog circuits using operational amplifier with optimum deviation from predicted results | K4: Analyzing                               |
| EC881.CO4 | <b>Optimize</b> constructed digital circuits with minimum no of components for lower floorplanning   | K4: Analyzing                               |
| EC881.CO5 | <b>Estimate</b> the performance of analog circuits for pre-specified input signals   | K5: Evaluating                              |
| EC881.CO6 | <b>Interpret</b> the behaviour of digital circuits for external random applied signal train  | K5: Evaluating                              |

**University Syllabus:**

| Unit                        | Content   | Hrs/Unit |
|-----------------------------|---|----------|
| 1: Discrete Analog Circuits | 1. Rectifiers. (To design a rectifier for a given average output dc voltage and a given load resistance, compare between the theoretical values of V <sub>dc</sub> , V <sub>rms</sub> , RF, HD, output regulation, transformer utility factor etc. with the measured values, and thus comprehend the relevance/effect of these various parameters.)<br>2. DC power supplies regulation and protection circuits. (To learn designing a series transistor-based output regulation circuit, an output current limiting circuit, fold back circuit needed for a given output parameters.)<br>3. Single stage audio frequency voltage amplifier with BJT for a given A <sub>v</sub> , Z <sub>in</sub> and Z <sub>out</sub> | 12       |

|                                |  |    |
|--------------------------------|--|----|
|                                | <p>and maximum symmetrical output swing.</p> <p>4. Single stage audio frequency emitter follower with JFET for a given <math>A_v</math>, <math>Z_{in}</math> and <math>Z_{out}</math> and maximum symmetrical output swing.</p> <p>5. Complimentary symmetry power amplifier with pre amplifier, if necessary, for a given out put power to a given load with single ended power supply.</p> <p>6. RC phase shift Oscillator, Wien Bridge oscillator, Hartley and Colpitt oscillator</p>   |    |
| 2: OPAMP Based Analog Circuits | <p>1. Inverting and non-inverting amplifier of given dc gain, input impedance and output impedance.</p> <p>2. Adder and subtractor. (To learn the basic design and function of a multi-input adder/subtractor (with ac and dc inputs present simultaneously).</p> <p>3. Comparator/voltage level detector for a given upper threshold level and a given lower threshold level with facility of independent adjustment of hysteresis and centre point.</p> <p>4. Active filters: LP, BP, HP, 1st order, 2nd order. (To learn the design of a filter and its inherent phase shifting characteristics.)</p> <p>5. 555 based monostable and astable of duty cycle below and above 50%.</p> | 12 |
| 3: Digital Logic Circuits      | <p>1. Design and implement a BCD to 7-segment decoder with basic and universal gates.</p> <p>2. Design and implement a 4-digit frequency counter with a clock generator.</p> <p>3. Designing logic circuits using multiplexers, demultiplexers and gates to implement logic functions.</p> <p>4. Design and implement a sequence detector.</p> <p>5. To design and implement a combination of a logic circuit and a RAM in order to generate a 4-bit data after simplifying alogic expression, to store the output data at a predefined location in the RAM, to retrieve the same and verify.</p>  | 12 |
| 4: Power Electronics           | <p>1. Design a Single-phase full &amp; shaft-controlled converter.</p> <p>2. Design of Microprocessor based Triggering socket.</p>   | 12 |

**Course Outcome**

| CO Number | CO statement  | Knowledge Level of revised Bloom's Taxonomy |
|-----------|---|---|
| CO1       | <b>Evaluate</b> domain knowledge in fundamental science for developing foundation of engineering maintaining environmental aspects (Basic Science)  | K5  |
| CO2       | <b>Interpret</b> qualitative attributes for ethical, social and professional values with sound communication attitudes as an individual or team member (Humanities)   | K5  |
| CO3       | <b>Estimate</b> engineering science knowledge for developing hierarchical professional growth related with electronics and communication engineering  | K5  |
| CO4       | <b>Measure</b> ability to solve complex engineering problems through professional core subjects relevant with electronics and communication engineering for benefit of the Society                            | K5  |
| CO5       | <b>Evaluate</b> design-oriented professional knowledge associated with core discipline for conducting complex investigations (professional elective)  | K5  |
| CO6       | <b>Assess</b> co-related subject expertization relevant with information science and engineering for sustainability in professional sector/academia as a part of life-long learning (free elective & overall) | K5  |
